## Skills

---

- HTML | Python | CSS | Flask | Git | Technical writing | Software engineering | Communication | Public speaking
- Research | Backend Engineering | English, Yoruba

## Experience

---

**Elizade University Tech Summit, Ondo, Nigeria.**

**05/2022 - 08/2022**

### Convener

- Planned and coordinated a team of students to host Elizade University's first Tech Summit, with first-time record 100+ onsite and virtual attendees.
- Directed all aspects of the event's organization and coordination, including setting the agenda, inviting and coordinating with speakers and sponsors, managing logistics, and general finance bookkeeping supervision that lead to 89% event goal attainment.
- Implemented new feedback mechanisms to assess the quality of live and virtual event content and recommended content restructurizing.
- Managed leadership, communication, and project management skills as well as a passion for technology and a desire to foster meaningful connections and discussions within a tech community

**Nigerian Universities Engineering Students Association – Elizade University, Ondo, Nigeria**

**08/2021 - 08/2022**

### Social Director

- Coordinated and organised a team of 10 to plan 8 events for the year and recorded a steep per cent improved events attendance compared to the previous year.
- Organised a technology introduction seminar for over 200+ students on the opportunities in tech and how to get into the technology industry.
- Influenced and suggested implementable ideas that improved students' turn-up for events and association welfare.

### General Secretary

**08/2019 - 07/2020**

- Coordinated and Organised team meetings to accommodate everyone's schedule.
- Documented and reported on every meeting
- Guided a team of 10 to organize a trade fair attended by over 500 students.
- Managed communication about planned events with the school's leadership.

## Education

---

### Elizade University

*Ondo, Nigeria*

- Bachelor of Engineering (B.Eng.) in Mechanical Engineering

### AltSchool Africa

- AltSchool of Engineering Professional training in Software Engineering; Specialising in Backend Engineering

## Projects

---

- **Blog Application:** Built a Blog application that works with user authentication and authorization for users to create and read blog posts; Developed with Flask Framework .
- **Grain dispensing machine:** Developed and constructed an automatic grain dispensing machine; Developed with Arduino Uno
- Created a technical write-up documenting the implementation of the Blog Application project.
- **School Management API:** Built a School Management API that provides a comprehensive solution for managing various aspects of the school administration.
- **Pizza Application:** Worked collaboratively with my fellow students on a class project to build a pizza application that allows users to customize their orders and place them for delivery or pick up.
